

**DESCRIPTION:**

Liquid Intelligents 120 Heavy Duty Dot 4 Brake Fluid. Liquid Intelligents 120 incorporates ant-corrosive and anti-wear additives to reduce corrosion and wear in light and heavy braking systems. Operating temperature range **-60 C to 258 C.**

Liquid Intelligents 120 is a clear amber brake fluid.

CHARACTERISTICS:**Boiling Point**

120 has a boiling point of 258 C

Freezing Point

120 has a freezing point of -60 C

Anti-Wear

Anti-wear additives assist to keep the braking systems moving parts in a good serviceable condition.

Corrosion Inhibiting Properties

Liquid Intelligents 120 Heavy Duty Dot 4 Brake Fluid has a unique anti-corrosive package, which retards corrosion in brake cylinders and callipers.

Liquid Intelligents 120 has the ability to absorb most of the free water produced in the braking system, this reduces the amount of water that can sit at the bottom of a cylinder or calliper corroding, pitting and etching seal surfaces causing premature leakage.

Recommendations

Liquid Intelligents 120 Heavy Duty Dot 4 Brake Fluid should be changed every 2 years.

Liquid Intelligents 120 Heavy Duty Dot 4 Brake Fluid meets all major specifications.
